ECOLOGICAL MONOGRAPHS

A QUARTERLY JOURNAL
FOR ALL PHASES OF ECOLOGY

MANAGING EDITOR: CRAWFORD G. JACKSON, JR., San Diego Natural History Museum, P. O. Box 1390, San Diego, California 92112

BOARD OF EDITORS

Robert L. Burgess (Book Review Editor, ESA)	Division of Environmental Sciences, ORNL, Oak Ridge, Tennessee 37830
Boyd D. Collier	Department of Biology, San Diego State University, San Diego, California 92182
Arthur W. Cooper	Department of Forestry, North Carolina State University, Raleigh, North Carolina 27607
Kenneth W. Cummins	Department of Fisheries and Wildlife, Oregon State University, Corvallis, Oregon 97331
Richard T. T. Forman	Department of Botany, Rutgers University, New Brunswick, New Jersey 08903
Kimball T. Harper	Department of Botany and Range Science, Brigham Young University, Provo, Utah 84602
Simon Levin	Section of Ecology and Systematics, Cornell University, Ithaca, New York 14850
James W. Porter	School of Natural Resources, University of Michigan, Ann Arbor, Michigan 48104
G. G. Spomer	Department of Biology, University of Idaho, Moscow, Idaho 83843
Walter G. Whitford	Department of Biology, New Mexico State University, Las Cruces, New Mexico 88003
Richard G. Wiegert	Department of Zoology, University of Georgia, Athens, Georgia 30601
Mary F. Willson	Provisional Department of Ecology, Ethology, and Evolution, Vivarium Building, University of Illinois, Champaign, Illinois 61820

ASSOCIATE EDITORS

Roger W. Bachmann	Department of Animal Ecology, Iowa State University, Ames, Iowa 50011
Beverly J. Rathcke	Section of Population Biology and Genetics, Brown University, Providence, Rhode Island 02912
Daniel Simberloff	Department of Biological Science, Florida State University, Tallahassee, Florida 32306

COPY EDITORS

Kathleen Frick Mary L. Morrill Cecelia D. Ross	San Diego Natural History Museum, P.O. Box 1390, San Diego, California 92112

Subscription price: the United States, $20.00 per year; Canada, Pan-American, and foreign countries add $2.00 postage. Single numbers of the current volume are $5.00. Back numbers, $24.00 per volume, $6.00 per number. All back issues are plus postage. Missing numbers will be supplied free when lost in the mails if written notice is received by Duke Press within one month of the date of issue. All remittances should be made payable to the Duke University Press, Box 6697, College Station, Durham, North Carolina 27708 USA.

Orders and materials for library exchange should be sent to Duke University Library, Gift and Exchange Department, Durham, North Carolina 27706.

Requests for permission to use copyrighted material should be directed to the Permissions Editor, Duke University Press, Box 6697, College Station, Durham, North Carolina 27708.

STATEMENT OF OWNERSHIP AND MANAGEMENT

ECOLOGICAL MONOGRAPHS is published quarterly in Winter, Spring, Summer, and Autumn of each year by Duke University Press. The Office of Publication and the General Business Office are located at Post Office Box 6697, College Station, Durham, North Carolina 27708. The Publisher is the Ecological Society of America. The Managing Editor is Crawford G. Jackson, Jr., San Diego Natural History Museum, P.O. Box 1390, San Diego, California 92112. The Business Manager is Ralph E. Good, Department of Biology, Rutgers University, Camden, New Jersey 08102. The Owner is the Ecological Society of America. There are no bond holders, mortgagees, or other security holders.

EXTENT AND NATURE OF CIRCULATION. Average number of copies of each issue during preceding twelve months: total number of copies printed, 4200; sales through dealers and carriers, street vendors, and counter sales, 0; paid mail subscriptions, 3713; total paid circulation, 3713; samples, complimentary, and other free copies, 19; returns from news agents, 0; total distribution, 3732; office use, left over, unaccounted, spoiled after printing, 468; total, 4200. Actual number of copies of single issue published nearest to filing date: same as above.

Second-class postage paid at Durham, N.C. and additional mailing office

TABLE OF CONTENTS

VOLUME 46, 1976

NUMBER 1, WINTER

Thermoregulation and Adaptation to Temperature in Dragonflies (Odonata: Anisoptera) ..... Michael L. May 1–32

Advantages and Disadvantages of Bank Swallow (*Riparia riparia*) Coloniality ..... John L. Hoogland and Paul W. Sherman 33–58

Forest Overstory Vegetation and Environment on the Missouri River Floodplain in North Dakota ..... W. Carter Johnson, Robert L. Burgess, and Warren R. Keammerer 59–84

Population Ecology of Two Sympatric Species of Subarctic Microtine Rodents ..... Paul Whitney 85–104

NUMBER 2, SPRING

The Foraging Specializations of Individual Bumblebees ..... Bernd Heinrich 105–128

Why Do Bumblebees Major? A Mathematical Model ..... G. Oster and B. Heinrich 129–133

Relationships of Environment to Composition, Structure, and Diversity of Forest Communities of the Central Western Cascades of Oregon .. Donald B. Zobel, Arthur McKee, Glenn M. Hawk, and C. T. Dyrness 135–156

The Foraging Strategy of Vermivorous Conid Gastropods ..... Paul J. Leviten 157–178

Nutrient-phytoplankton Relationships in the Holland Marsh, Ontario ..... Kenneth H. Nicholls 179–199

Small Mammal Energetics in Grassland Ecosystems ..... N. R. French, W. E. Grant, W. Grodziński, and D. M. Swift 201–220

NUMBER 3, SUMMER

Local Adaptations in Chipmunk (*Eutamias amoenus*) Populations and Evolutionary Potential at Species' Borders ..... James B. States 221–256

Organization of a Tropical Guild of Nectarivorous Birds ..... Peter Feinsinger 257–291

A Model of the Dynamic Exchanges of Water and Energy Between a Terrestrial Amphibian and Its Environment ..... C. Richard Tracy 293–326

Community Structure: A Neutral Model Analysis ..... Hal Caswell 327–354

NUMBER 4, AUTUMN

Organization of the New England Rocky Intertidal Community: Role of Predation, Competition, and Environmental Heterogeneity ..... Bruce A. Menge 355–393

Late-Wisconsinan Vegetational History at Wolf Creek, Central Minnesota ..... H. J. B. Birks 395–429

Some Physical and Biological Determinants of Coral Community Structure in the Eastern Pacific ..... Peter W. Glynn 431–456

Within- and Between-Habitat Avian Diversity in African and Neotropical Lowland Habitats ..... James R. Karr 457–481

Instructions to Authors

The pages of ECOLOGY and ECOLOGICAL MONOGRAPHS are open to research papers dealing with all aspects of ecology and to discussions and essays that develop ecological theory. All papers must be in English.

ECOLOGY considers papers up to 20 printed pages long, including illustrations. ECOLOGICAL MONOGRAPHS handles papers which initially are estimated as longer than 20 pages. Three pages of typescript equal approximately one printed page. Illustrations and tabular material together may constitute up to 20% of the total printed pages. Extensive tabular data too raw or costly to publish can be made available to readers through microfilm or microfiche services.

Manuscripts should be submitted to the Managing Editor. Authors will be notified of receipt of the manuscript. A designated subject-matter editor is responsible for review and acceptance or rejection of the manuscript. Technical correspondence concerning the manuscript may be directed to that editor. Turnaround time for manuscripts is usually a minimum of 90 to 120 days after receipt by the Managing Editor's Office. Delays in obtaining reviews may prolong this period. If a manuscript is returned for revision, the author should submit his revised manuscript to the subject-matter editor within 6 months. Manuscripts undergoing revision for longer than 6 months may (at the discretion of the subject-matter editor) be considered as new manuscripts and submitted again to review. The author should provide a forwarding address if he moves from the return address shown on his manuscript. American authors *must* specify zip code designations. *The CBE Style Manual, Third Edition*, available from the American Institute of Biological Sciences for $6.00, is recommended for details of style. **Manuscripts that do not conform in most respects to the instructions below will be returned to authors for correction before consideration.** Fewer than a third of manuscripts received can be printed.

PREPARATION OF MANUSCRIPT

Write with precision, clarity, and economy; use the active voice and first person whenever appropriate. Every sentence should convey the exact truth as simply as possible.

Type all material (text, tables, quotations, footnotes, literature cited, etc.) **double spaced,** on only one side of standard sized paper approximately 21 by 28 cm. Leave ample margins. Do not use very thin paper, even though overseas mailing is required.

Send the original manuscript **plus at least two copies.** The original and copies must include illustrations. Photocopies are preferable to carbons. Retain at least one complete copy of the manuscript in your files. **DO NOT** submit original India-ink figures due to the risk of loss or damage in the mails.

Titles of articles should be informative and short, usually not more than 10 words. A **running head** not longer than 40 spaces should be provided when the title exceeds this length. Titles with numerical series designations will not be accepted.

Each paper must include an abstract immediately following the title and author's name. Abstracts should record succinctly the essential findings, i.e., they should be informative rather than indicative. Do not include details of methods and results. Tables of contents and terminal summaries are no longer printed. Include, following the abstract, a **list of 6–12 key words** for indexing.

Do not underline any words except scientific names.

Avoid footnotes; most footnote material can be incorporated in the text to the benefit of readers, editors, and printers.

Acknowledgments, if extensive, should be placed under a heading just before the Literature Cited.

Literature Cited must be double spaced. Before submitting the manuscript, check each citation in the text against the Literature Cited to see that they are in agreement. The listing should conform in sequencing and punctuation to that in current issues. Consult the *CBE Style Manual* for details.

Authors are to use the metric system for measurements.

Tables must each be **typed double spaced on separate sheets.** Number tables consecutively and give each a short title. Do not rule tables unless essential to avoid ambiguity. Consult recent issues of the journal for style. Never repeat the same material in figures and tables; when either is equally clear a figure is preferable. Avoid unnecessary material, especially tables and long lists of little interest save to the author; this material will be edited rigorously.

Algebraic symbols will appear in italics in print. Formulae to be set separately from the text should not exceed the width of one column. If longer the editors will break the formula into two or more lines. Authors should write their formulae with this in mind and indicate where each formula may be broken. Subscripts and superscripts should be clarified by marginal notes, and subscripts of subscripts should be avoided. The author can insure the accuracy of his formulae and simplify the job of the editor and printer by grouping formulae and preparing them as a figure.

Text figures generally should not exceed 21 × 30 cm. High contrast photographic copies of line drawings, maps, and graphs are essential. Most illustrations will be reduced to a single-column width: letter meticulously using letters large enough to leave characters at least 1 mm high after reduction. *Typewritten lettering within the body of figures is not acceptable.* On figures to be reproduced at single-column width, the height of the lettering should never be less than 1.5% (nor more than 3%) of the width of the figure. Capital letters take reduction better than lowercase. Photographs should be printed for contrast, on glossy paper, unmounted or mounted on light cardboard.

GALLEY PROOF AND REPRINTS

Correct (*not* revise) both sets of proof identically, retain one, and return one promptly, **with the edited manuscript,** to the Managing Editor. Mail the reprint order form, showing whether reprints are desired, to the Printer as directed.

INDEX TO ECOLOGICAL MONOGRAPHS, VOLUME 46, 1976
